

Mississauga East–Cooksville Daily News

DAY ONE – August 31 2021

Hear ye Hear ye

Let it be known to all Canadian Residents 18 years and over of Mississauga East–Cooksville

Pursuant to subsection 71(1) of the Canada Elections Act, Jim Kotsianas, returning officer for Mississauga East–Cooksville **confirms the nomination** of **Samuel Elliott**.

Candidate Name on Ballot: “**Elliott, Gord**”

Political Affiliation: **Independent**

Electoral District: Mississauga East–Cooksville (35059)

From: Political Entities Service Centre (PESC)

For Political Activity: FORTY-FOURTH GENERAL ELECTION (2021-08-14 to 2021-09-20) Canada

Signed: Elections Canada

It is official, I have been appointed as the Candidate for the above Political Entity.

Forty residents of 1315 Bough Beeches and seventy-five early morning people on Aug 29 and 30th made this happen and I thank you all. You were the dog walkers, moms with babies in strollers, parents in the parks, grandparents with their grandchildren swinging them in the park. The blind girl collecting yellow daisy flowers and putting them in a white bowl, to Lance who wants to start his own Business, to Gord who debated but never signed the sheet, to all those who were fearful of talking to a stranger and ran away. You asked: “What do you stand for?” and “I don’t know you!” That is the number one question. May I ask the same question to all 120,000 voters in Mississauga East–Cooksville?

I thank you all for the opportunity to run in a race that cannot be won. I believe that one man or woman being part of a whole can find the truth and set us free from this nightmare called COVID-19.

What do I stand for? I am a specialty printer of STICKY NOTES and ESD paper. I am the only printer of this ESD paper in the free world. It is a critical component in supporting the Essential Critical Infrastructures for Medical, Chemical, Semi-conductors, computer chips, and other critical/life sustaining manufacturers across North America. My problem is my landlord wants to shut my factory down so that he can get more money for renting the facilities for BOX STORAGE. The landlord wants to move my rent from \$6.75 per sq/ft plus TMI to \$12.00 per sq/ft plus TMI.

I have asked my lawyer, Doug Ford (come on guys give us a break), Peter Foncesa, Gagan Sikand (lib Miss-Streetsville), and the CFIB (Canadian Federation of Independent Businesses) why are landlords, retail and commercial, allowed to increase our rents by 130% (Great West Life) and not renewing our leases.

Answer: because there is no law preventing them from doing it. They are above the law because there is no law. Now it becomes WHO, WHAT, WHERE, WHEN and WHY the five W’s to find out the real answer. We will leave that to another day.

Mississauga East–Cooksville Daily News

DAY TWO – September 1 2021

“You can give a man a fish and feed him for a day or you can teach a man how to fish and feed him for a life-time.”

If you go to Registered Political Parties in Canada you will find that there are 22 and Independent is missing. Independent being on the ballot is the 23rd but not registered. This is very important as my hands and mind are free from party politics. That being said the other 22 parties all have the following: Party Leader, National Headquarters, Registration and Eligible Date, Chief Agent, Auditor, all registered with Ottawa. Then there is their house of cards and all that goes with that.

There are 22 registered political Parties in Canada and one not registered being **“INDEPENDENT”** – now we have 23 political parties running.

Rule One: First candidate out of the gate wins. Therefore, if you are super angry, fed up, feel that you have no voice, don't like any of the horses Red, Blue, Orange or Green. Now there is another horse in the race. I am riding the Black Horse with the white stripe called **Independent**. Second place is not an option. Ladies and gentlemen place your bets.

Let's look at the jockey on the Black Horse with the white stripe. Born in Toronto in 1951 to Scottish immigrants who came to Canada by ship after WW2. They were sponsored by their Uncle Sam who came after WW1 who's occupation was Chauffeur. Uncle Sam was on call 24 hrs/day for many Mayors of Toronto most important being Nathan Phillips (and Wilhelmina, Queen of the Netherlands, when she visited).

Inspired by Uncle Sam, Gord received his driver's licence on his 16 birthday. The driver's licence gave Gord the opportunity to spend his weekends at Markham Airport working on his private pilot licence under the care and guidance of the two Jans, both were WW2 pilots, Jan Lewendowski and Jan Fawkowski. High school was spent at Cedarbrae Collegiate challenging the teachers and protecting the undesirable kids. He passed grade 13 but they changed the rules and refused to give him his diploma. Gord believes that it was because he narked out the narcs. At 14 Gord spent 6 weeks at the University of Guelph and received his Certificate in Floral Design.

During the summer of 1969 Gord did his walkabout (10 weeks) through the South Pacific and Australia. On the first day he had the pleasure and honour of spending 10 hours with Humaira Begum on the flight from Toronto to Mexico City.

After high school he hitch-hiked across the USA and up the interior of BC, where he found a job fighting forest fires at Birch Island with the Haida Indians. He made enough money to buy his first car and sang Janice's song Mercedes Benz for that fall. Lived with his aunt and uncle in Port Couquitlam hitching to and from the train yard where he cleaned grain box cars – the Benz had a bad rad leak. One night in 1972 Gord was picked up in a white pickup truck owned by Robert Pickton (that was before “See Something, Say Something”).

Having enough of BC he returned to Toronto and started flight training at Seneca College. He got to number 19 out of 650 applicants but only 18 could graduate. He was found to need glasses and was cut from the last semester of the program. Gord had the highest overall marks and was the best pilot that year. Strangely, however, Gord was offered a teaching position at the college but declined the offer.

Instead he finished the course got his licenses and was offered a job in New Brunswick bug spraying and water bombing before the 18 even graduated. Gord didn't show up for flight duty instead he started a new career in printing.

Back to the horse race.

Please check out the other horse's websites, but I will summarize as follows:

- Red horse slogan (Our Plan) should read Justin's plan there are 13 read more boxes
- Blue horse slogan (Canada's Recovery Plan) (Read the Plan) with 5 learn more boxes
- Orange horse slogan (Ready for Better) with 7 learn more boxes
- Black horse with white stripe slogan (not there yet) with zero boxes

DAY THREE – September 2 2021

THE PLAN “The Times They Are A-Changin”

I challenge all the leaders of the 22 political parties for the opportunity to be Prime Minister of Canada. Every person regardless of party affiliation should have the opportunity to be Prime Minister of Canada. Using, whosoever gets the highest percentage of votes in their riding becomes the Prime Minister of Canada. Next a list of job placement positions and duties required to run the country. All members selected from each riding will fulfill those positions. Names will be selected for the higher positions using again the highest percentage of votes received. The balance of the names will be placed in a clear drum and the Prime Minister will randomly select his cabinet. This way there is no longer any party planning. The parties will still exist but, the Government of Canada will no longer be left or right, pro or against, but be composed of free thinkers not bound by party oaths, vows or bribes. This way we can address the real issues of Canada and hopefully no longer be controlled by foreign powers from higher places.

The election was called because **Justin Trudeau and PHAC president Ian Stewart** are in *contempt of parliament*. Both individuals have **refused to release the 250 page document related to Canada's involvement in making the COVID virus**. The PC, NDP and BLOC voted 176-150 on June 17, 2021 and charged the Liberals with contempt of parliament and both Trudeau and PHAC president Ian Stewart **refused to go before the bar**. Instead Justin called an election rather than releasing the file connecting Canada to Covid.

Hear Ye Hear Ye - All leaders of political parties in Canada I hereby challenge you as leaders and the challenge has been made - Will the leaders accept my challenge? The system is broken, factories are closing, people are living in parks. The only aid the government is giving us is port-a-potties, Lotteries, Drugs, Alcohol and Media Propaganda.

The Plan - No more port-a-potties. Once elected the first thing I am going to do is go to the

Ontario Supreme Court and file a case against the Landlords and Property Managers of the retail and commercial properties to cease and desist their criminal activity. I will also go and put forth an injunction against all residential landlords and superintendents to cease and desist all their evictions and make **RENOVICTIONS** illegal and a criminal offence. These actions will remove the loopholes in the Landlord and Tenant Act and there will be a new Tenant Act for Retail and Commercial.

Elections results should not be determined by the number of signs on the street or the amount of money spent campaigning. The Canadian Elections System is based on first out of the post for only two political parties which in reality represents less than 9% of the population. I propose putting first out of the post to each individual riding we will then have a good selection from all political parties represented in the House of Parliament under a new system coalition OR independent representing the whole of Canada. It's based on the individuals campaigning - not what's dictated by what's in a political box.

When the three parties are on the same train then where is the opposition and who is the engineman?

Today the only topic is Vaccine Passports – all three want Vaccine passports. What happened to the 172 wanting the 250 page document. Canadians need to know the truth even if it hurts! What is Prince Justin hiding? *The times they are a-changin*.

Today's new word: **“Manipulated Media”** is the issue of misinformation and disinformation being shared during election campaigns.

DAY FOUR – September 3 2021

LIES MY FATHER TOLD ME

“Trudeau's housing plan won't stop money laundering from fuelling housing prices.” by Dione Francis

“Ruinous high property prices have hurt the middle class and made Canadians among the world's most indebted consumers due to high mortgages.”

In August 2021 a report came out entitled “Acres of Money Laundering” It was published by Global Financial Integrity (GFI) in Washington DC. Today's new word “snow washing” the flow of billions of dollars of dirty money into Canadian real estate. Since 2015 Ottawa (Justin) has ignored the recommendations made by GIF and FATF (Financial Action Task Force). GIF's report analyzed 35 cases involving US\$626.3 million in laundered funds. (2019 report by the RCMP estimated that C\$46.7 billion was laundered in Canada in 2018 alone.)

The laundered money came from drug traffickers 58.5%, foreign origins China 22.85%, USA 11.4%, Republic of Congo 8.5% the rest divided amongst Chad, Mexico, Columbia, Malaysia, Russia and Libya. The enablers were: 22.8% lawyers, 14.2% real estate agents, 11.4% real estate development companies with the balance among financial institutions, crypto currency outfits, property managers, accountants, and mortgage brokers. What are they buying? 88% residential, 20% commercial and 5% agricultural in Canada.

The USA is doing something about the global money laundering scourge. Trudeau encourages it. The Canadian government gets tax dollars and skylines in Vancouver and Toronto all built to house laundered money. It appears to me that they know Who, Where and What's going on. I propose legal action and seize the \$46.7 CDN billion. It boils down to just a signature and someone saying; “Do it”. This brings us to the topic of CRA. Being a small business and being self employed I want all of you to know we are not rich and if asked I would say do not start a business. It's like a time share 4.5 million people own a time share 4 million are trying to get out of the contract. Don't buy a time share.

CRA does something called an audit and they send you a demand note that you have to pay or they will contact your bank and issue a writ against your assets. The banks in turn are required to empty all your accounts, corporate, personal, stocks, bonds and pension funds. I asked Peter Fonseca about this since CRA hit all 3 of my bank accounts. Again Peter said cannot help. CRA could, in fact, get 3 times the amount that they ask for because the banks don't communicate with each other. You then have to request proof that they took the money and it could take you 3 to 5 years to get this sorted out. After CRA takes the money you have to prove the audit is false. Good Luck with that! I remember years ago a very large printing company in Canada got an audit of \$3.5 million and CRA eventually settled for \$300,000. It went something like this. The company refused to pay the \$3.5 million and indicated to CRA that they would close their factories and 300 people would be unemployed. CRA backed off. But in my case it took 10 years to get CRA to back off and drop the charges. The audit was false and there was no adjudicator, no one to talk to, no one to help me.

I will, once elected, reform the interest charged and the collection practices of CRA. Let CRA collect the dirty money and leave the small businesses alone. All branches of government are anti-small business including Ontario Ministry of Labour, Ontario Ministry of Finance, WSIB, CPP, Corporate Tax Office and the list goes on. The latest government scam is “**Back Washing**”. The Ontario government mandated all commercial factories to add a \$150.00 valve at all water intake source at a cost of \$2,500.00 per unit. Wait for it, it will come to your house soon. Water tax, then a flush tax, Energy tax, pipes in the ground tax . How many categories are on your hydro bill and what about the hydro energy scam of pick a provider. In the words of Doug Ford “Come on guys give us a break.”

Signed Angry Bird

Mississauga East—Cooksville Daily News

DAY FIVE – September 4 2021

Today is Print day – Not A Trivial Matter

I have finished the copy for Day One Two and Three and picked up the negative film. I do it old school, strip the film to a aluminum plate, burn the image into the plate with a Mercury Bulb for 80 seconds, develop the plate, Gum with Arabic Gum, punch register holes at one end of the plate, bend the plate, then place it on the print cylinder of the press. Add ink black for one side blue on the other side. Black and blue represents that we are badly broken and bruised. Next I web a 200 lb roll of paper through the press, add compressed air to the press, put on my safety glasses and ear protection press go and let it RIP. Three hours later I have 30,000 flyers/ news paper/ and my printed platform ready for distribution.

Talking about print on paper. Print was the number one employer worldwide for over 50 years until the government regulated, over taxed, recycling came along, governments banned cigarette hard packs, resulting in the paper mills closing. Then along came Trivial Pursuit.

GO TO Wikipedia Trivial Pursuit History.

The game was released in 1981 – Northern plastics of Elroy Wisconsin produced 30 million plastic game pieces for Trivial Pursuit between 1983 and 1985. That's just the game pieces they were then collated with a dice and placed in a printed zip lock bag. In December 1993 Trivial Pursuit was entered into the "Games Hall of Fame".

By 2014 one hundred million games had been sold in 26 Countries and 17 Languages. Any idea as to total revenue? 100 million x \$ 29.00 each = **US\$ 2.9 Billion dollars in retail sales.** What about the tax dollars the governments got for doing nothing?

Any idea as to how many man hours of work was generated by Trivial Pursuit? Let's see; there was the playing pieces, dice, printed bag, the rule sheet, the game board with a printed label and black paper board cover on 85 point chip inner. Then you have the 1,000 cards printed, collated, cut and boxed into two set up boxes. Also there was a base tray with a wrap die cut . You take all those components set an assembly

line, place all the items into another set up box, assembly (which requires 8-10 people), add the plastic wrapper then put through a shrink tunnel and pack 10 games into shipping cartons then place 30 cartons on a wooden skid. 100,000,000 games divided by 300 game per skid equals 333,333 skids.

I once asked a psychologist. What's going on in our food chain? Her answer was : (We feed off of each other, everyone is somehow connected to each other, and we feed off of each other.)

My guess 10-15 million man hours to assemble and distribute plus 1.6 billion man hours playing the game.

Conclusion: Whoever engineered Trivial Pursuit deserves a medal and a standing ovation, or a pat on the back, or maybe just a simple thank you .

Look at the complexity of the game. The first 1500 games the pieces were too tight and wouldn't come out of the pie. The first 50 million games were manufactured in Mississauga. What is the real story? How did it begin? Why was it so successful? How did they do it?

Let's start with E. Joseph Cossman from California. A teacher and conductor of sales seminars. (*See Wikipedia*) Joseph did a seminar in Montreal in 1979 where Scott Abbott and Chris Haney attended.

Joseph also did a seminar in 1983 in Toronto where Gord Elliott attended. During that seminar Joseph talked about the intricacy/complexity, and creativity that went into the game. He said "I wish that I had invented that game." He never knew that both Chris and Scott were Cossman Graduates and using his crappy photo copy book Joseph sold, they actually created Trivial Pursuit. The rest is history!

Joseph was one of the few men to teach a man to fish. KUDOS to you Joseph.

Joseph passed away in Dec 7, 2002 age 84.

Chris Haney passed away in May 31 2010 age 59

Chris and Scott (posing as reporters) attended a Montreal toy fair (1980) there they met Jerry Rowan and Jerry sent them to me.

Now we have to go to a small town called Edgar, Ontario where you will find RCAF STATION EDGAR, it was part of the Pinetree Line of radar stations about 20 km (12 miles) northeast of Barrie.

See Wikipedia RCAF STATION EDGAR read it then go back and tap NEW WORD "Deinstitutionalisation"

Note: The Ontario government purchased the base for \$ 218,225 in 1964 (John Robarts PC 1961-1971) and used it as an Adult Occupational Centre for developmentally disabled (politically correct way of saying Down Syndrome) and handicapped adults and closed the centre in 1999 (Mike Harris PC 1995-2002). The Base, I would call it a very small town or village had 84 residences (houses or cabins). Two office buildings, a swimming pool, bowling alley, baseball diamond, hospital, church, and a school. Not in the article they had aircraft hangars!

This was a very special place. Jerry and Gord visited the site many times. Always on our arrival everyone would drop what they were doing leave the hangar and come out to greet us with big hugs and shake our hands. Each taking their turns. Every guest got the same response. The supervisor was always last out and apologized for their enthusiasm. They had few visitors but it was home, safe, clean and caring environment. After putting in a good 8 hours they would go to the mess hall and have supper. Everyone had a chore to do and nobody complained. Some even fell in love got married and had children. Coincidentally, many years later after the line had closed, one such child named BJ came to live with Gord and his wife. BJ was a very good hard worker and eventually went to college and graduated in computer tech. BJ now has a very well paying position with one of the cell phone companies. He got married owns a house a car and lives a normal life. What a treat having BJ as a close family friend.

Jerry would inspect and quality control the finished products I would talk with the gang and get the latest low downs and latest jokes. The best time was Christmas (remember Christmas) when dress up was in the air. Why am I telling you this? I would guess that there were 50 to 60 residents and 3 to 5 staff members. The larger percentage were down syndrome adults. All shapes, all sizes, different

ethnics. It was one large family of friends with similar challenges and no worries about tomorrow. All year long they assembled toys for you know who and they knew that they were special because of you know who. That is how they viewed it until 1999 when Mike Harris (PC 1995-2002), to save money, but it was self supporting. Maybe it was cancelled for not paying minimum wage only Mike Harris knows why it was closed down "Deinstitutionalisation" was the word of the day. At a stroke of a pen they lost their friends, their hope their dreams and their family. So who got the land – it was promised to the Indigenous Peoples, of course they didn't get it. Again messed up or corrupt politics at its best.

From 1964 to 1999 a lot of toys came from Edgar not China. I remember the plastic cups and saucers, tea sets, and dolls for the little girls. Fire engine trucks, fireman hats, plastics toy guns and bow and arrows. They all had their spot on the production line, they all sang to themselves as they worked and focused at doing their best, for you know who.

Today the down syndrome people are on the endangered species list. What are we to do but be ashamed as to how far the government has allowed us to fall. It is true the Liberals and Conservatives eat their young. Edgar and the down syndrome people assembled the game pieces and dice into the bags for you know who.

Addendum: Sept 7 2021

So the governments like the environmentalists lobby because they donate lots of cash for the cause, whatever that is. The mills continued to close in 1985, paper cost 35 cents a pound and we had over 25 paper mills. In August 2021 paper cost 83 cents a pound today September 7, 2021 paper costs \$1.15 per lb .and I think we are down to 10 mills a little home work, but you will not do it so why ask.

How many paper mills have we lost in the last 50 years and why?

* *pulp and paper Canada.com / pulp-and-paper in Canada's first century 1894 - 1930 May 1 2003*

* *Pubs.cif-ifc.org/doi/pdf/10.558/tfc 2014-151 The rise and fall of the Canadian pulp and paper sector.*

Any suggestions as to handle our current paper shortage.

Mississauga East–Cooksville Daily News

DAY SIX – September 5 2021

THE IDEA – *Can anyone please help me to find someone to ...*

Can anyone interpret a dream? A long time ago I had a dream. It started with me waking up and not seeing anything it was as if I was blind. I was in a very dark forest and I found a talking family of Kangaroos.

Ok, I know you will Google “interpretation of dreams” so go ahead do it.

Ready set go. You will find a book by Sigmund Freud, he concluded that we had a id, Ego and A superego. What is the id? The id is the impulsive (and unconscious) part of our psycho which responds directly and immediately to basic urges, needs and desires ... The id operates on the pleasure principle (Freud 1920) which is the *idea* that every wishful impulse should be satisfied immediately, regardless of the consequences. WE are all ids.

Google What is “id”? What did you find? What pops up? What did Google say?

id / entity – idolatry, identity crisis, idle no more,

If you study the teaching of Freud it would take years and years, in the end you would discover that id stands for idiot.

The dream

I woke and found myself enveloped in darkness only my hands could communicate with my mind. I felt a large tree trunk . I was laying in the swell of a tree trunk perpendicular with the tree. The ground was dry no leaves dead or growing. My eyes became accustomed to the darkness a dead forest extended all around me. I stood up and heard a scratching noise behind one of the larger trees. I approached. A head turn round to look at me. It was a Joey. It looked at me and said do you have any food. I don't think so I said. Then two more heads peaking around other trees. It was Joey's mom and dad big red Kangaroos.

I said let's go look for food. I saw a very faint light we walked towards it. Then in the darkness behind a tree I saw a Huntress with a bow and arrow ready to shoot. I shouted stop and got between the family and her. I said we are in Canada and these are Kangaroos they must belong to someone and they must be lost. Can you help me find there master. The huntress said, “Yes, I will help.”

So I lead the way through the dark forest with the family of kangaroos behind me ever tense and afraid of the huntress and the huntress bring up the rear. We meet a man carrying an old news paper route denim bag. He was in tatters and was wearing a jacket and had a hat. On the hat was a sign that read (zoo keeper).

To be continued.

Meaning of Numbers (short form) from the Book of Numbers

1. Only divisible by itself
2. Union (Man and woman)
3. Righteousness
4. Material Universe
5. Grace
6. Man and human weakness
7. Completeness and perfection
8. New beginning
9. Completeness or Finality
10. Blessing, Law, Testimony
11. Disorder, Chaos and Judgment
12. Time
